Technician Proficiency Worksheet

Position	Technician	Project Cordination	Paper work	Timesheet input	Nightly Project Updates	Prep Work	Read Floor plan	Number Floor plan	Determine Cable Pathways	Install J-Hooks	Cut-in rings	Fish walls	Fish Conduit	Bend Conduit	Install Sleeves	Fire Caulk	Install Plywood	INDOOR COPPER	Pulling 4 pair cable	Pulling 25 - 300 pair feed cable indoor	Jack 4 pair cable	Place Faceplate & label	Build MDF/IDF	Dress cable	Terminate MDF/IDF	Test cable & certify	OUTDOOR COPPER	Pulling 25 - 300 pair feed cable	Prep Gell Filled Cable	Splice Copper with 710 tool	Place copper in Protective Splice Enclosure	Install Lightning Protection	INDOOR FIBER	Install J-Hooks	Pulling Inner-Duct	Pulling Fiber 2 - 72 strand	Dress Fiber cable	Terminating with ST connectors	Terminating with SC connectors	Terminating with LC connectors	Test cable & certify	Fusion Splice Fiber	Mechanical Splice Fiber	OUTDOOR FIBER	Pulling Inner-Duct	Pulling Fiber 2 - 144 strand	Dress Fiber cable	Prep Gel Filled Cable	Install Breakout Kits	Test cable & certify	Fusion Splice Fiber	Mechanical Splice Fiber	Place Fiber in Protective Splice Enclosure
PM	Matt Helton																																																				
LT	Paton Richardson																																																				
LT	Peter Elisher																																																				
LT	Clint Beezley																																																				
T3	Justin Whitton																																																			
T2	Wil Freize																																																			
T2	John Tibbett																																																			
T2	Tim Reed																																																			
T1	Ian Proctor																																																			
T1	Antonio Tablan																																																			
T1	Josh Vasquez																																																			

Note:

Legend:

V = Very Good
G = Good
E = Efficient
N = Needs Improment
R = Requires More training
T = Terrible

PM = Project Manager
LT = Leat Tech
T3 = Tech Level 3 (can install copper & fiber & run small jobs)
T2 = Tech Level 2 (can install copper & fiber needs supervision)
T1 = Tech Level 1 (helps runs cable, drops, jacks, labels, tests needs supervision)
